Ever since assuming his post as the fertility god on duty, Elum has been very good at keeping up with his responsibility of giving birth to the successors of all other gods.

That, however, is not the only thing that his "job" entails.

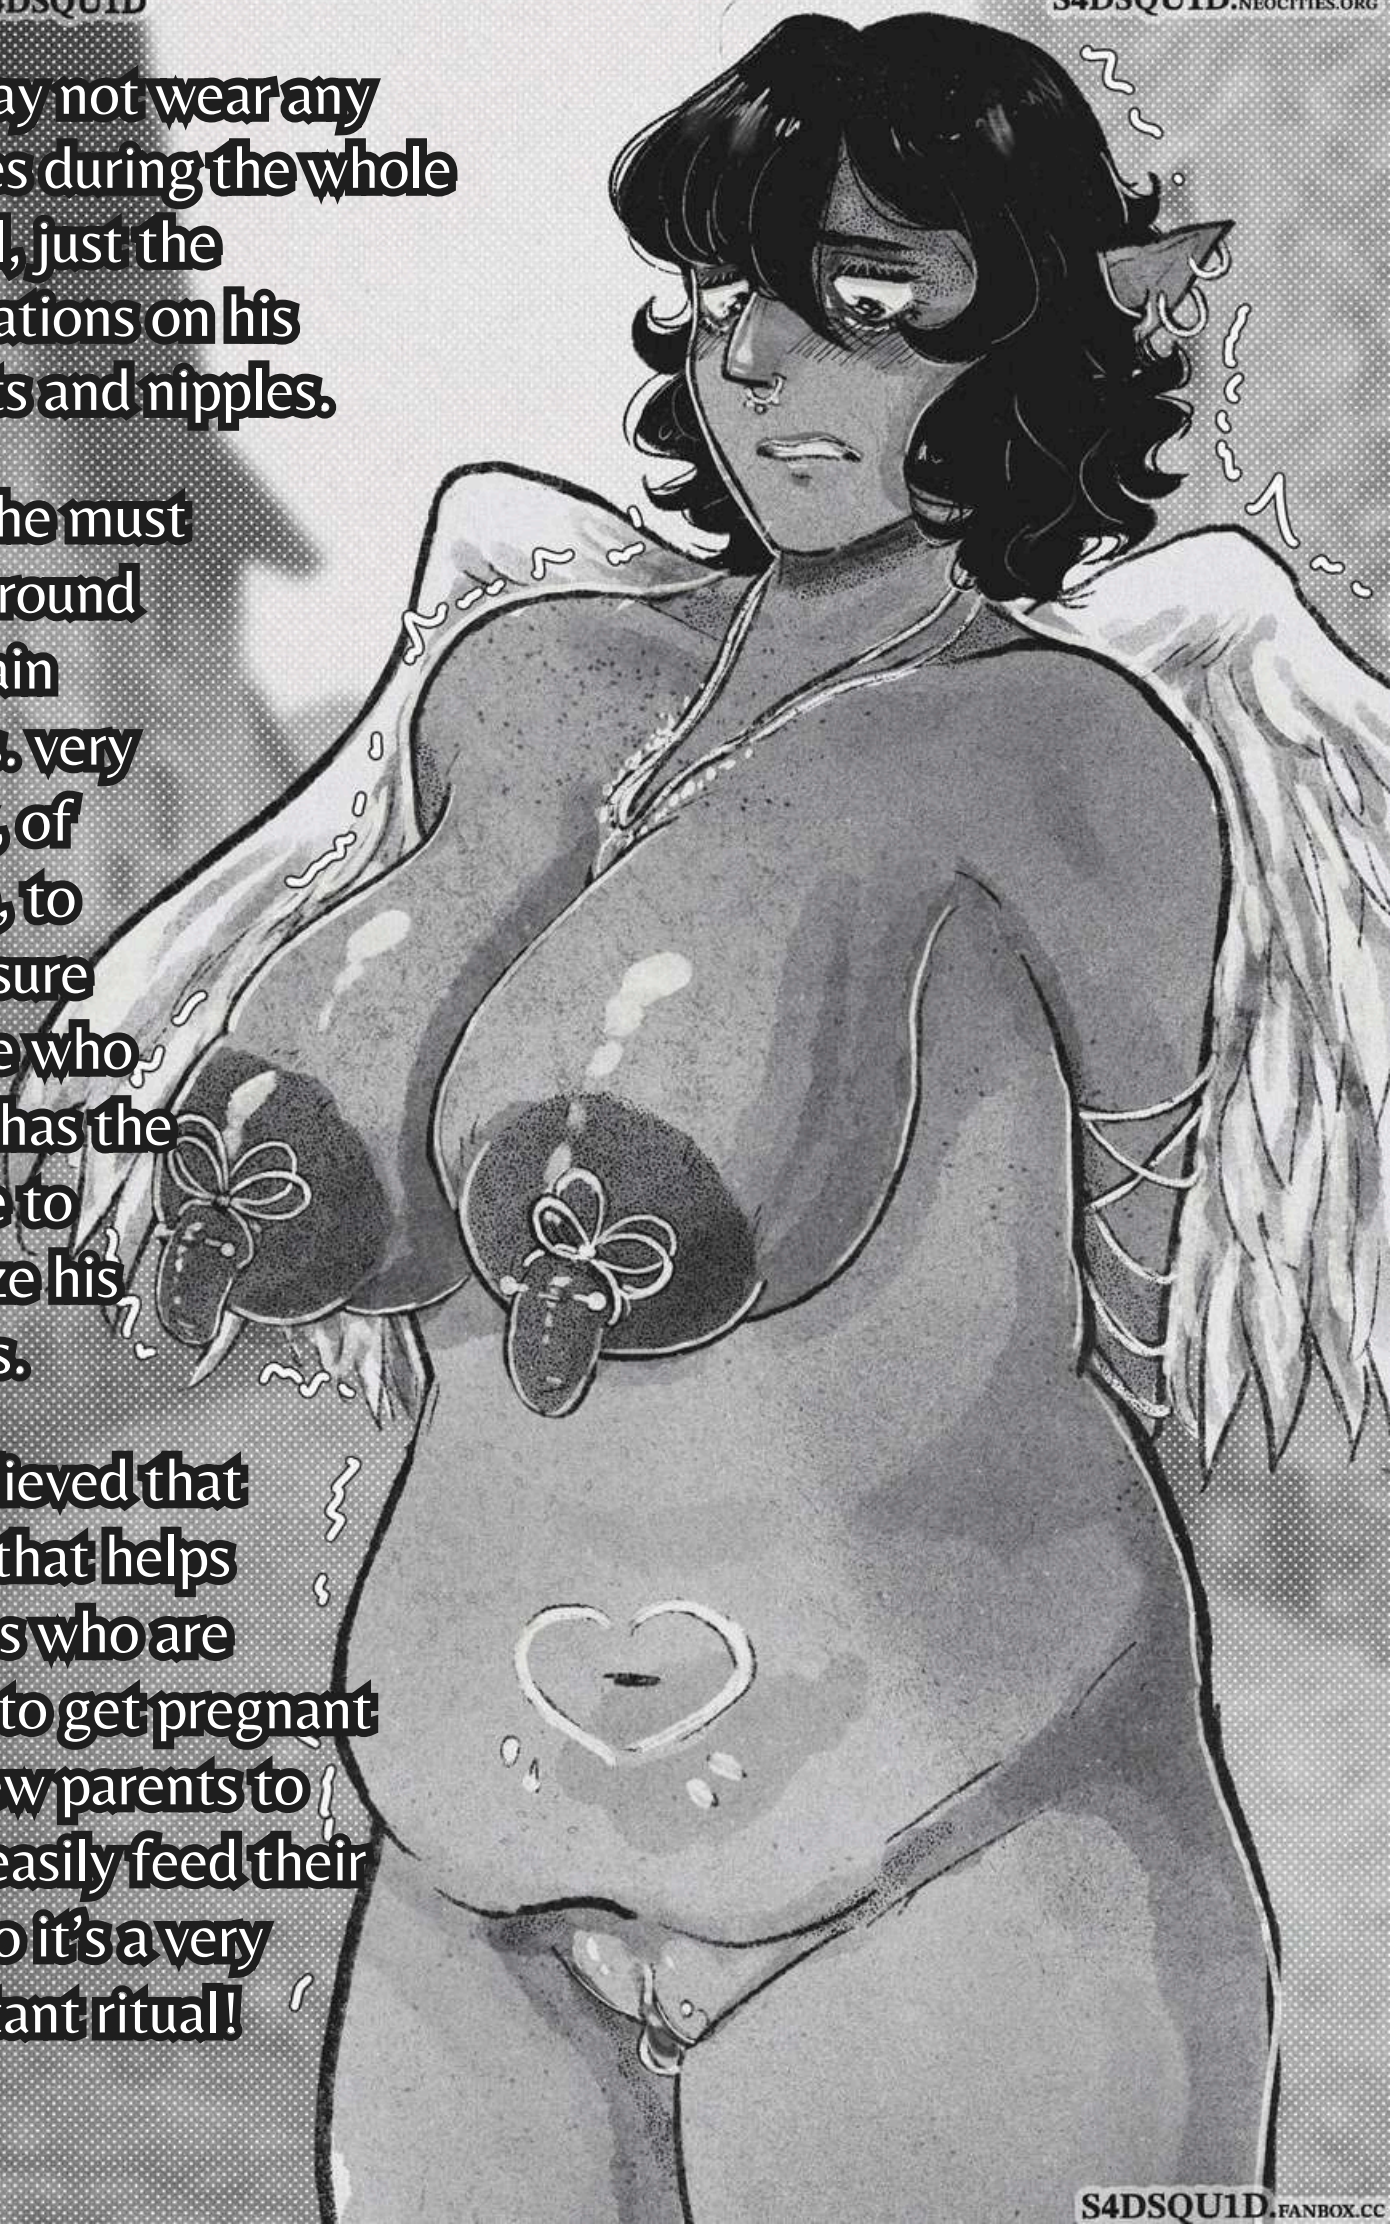

Once a year, he must also partake in a "milking ritual".

He may not wear any clothes during the whole ordeal, just the decorations on his breasts and nipples.

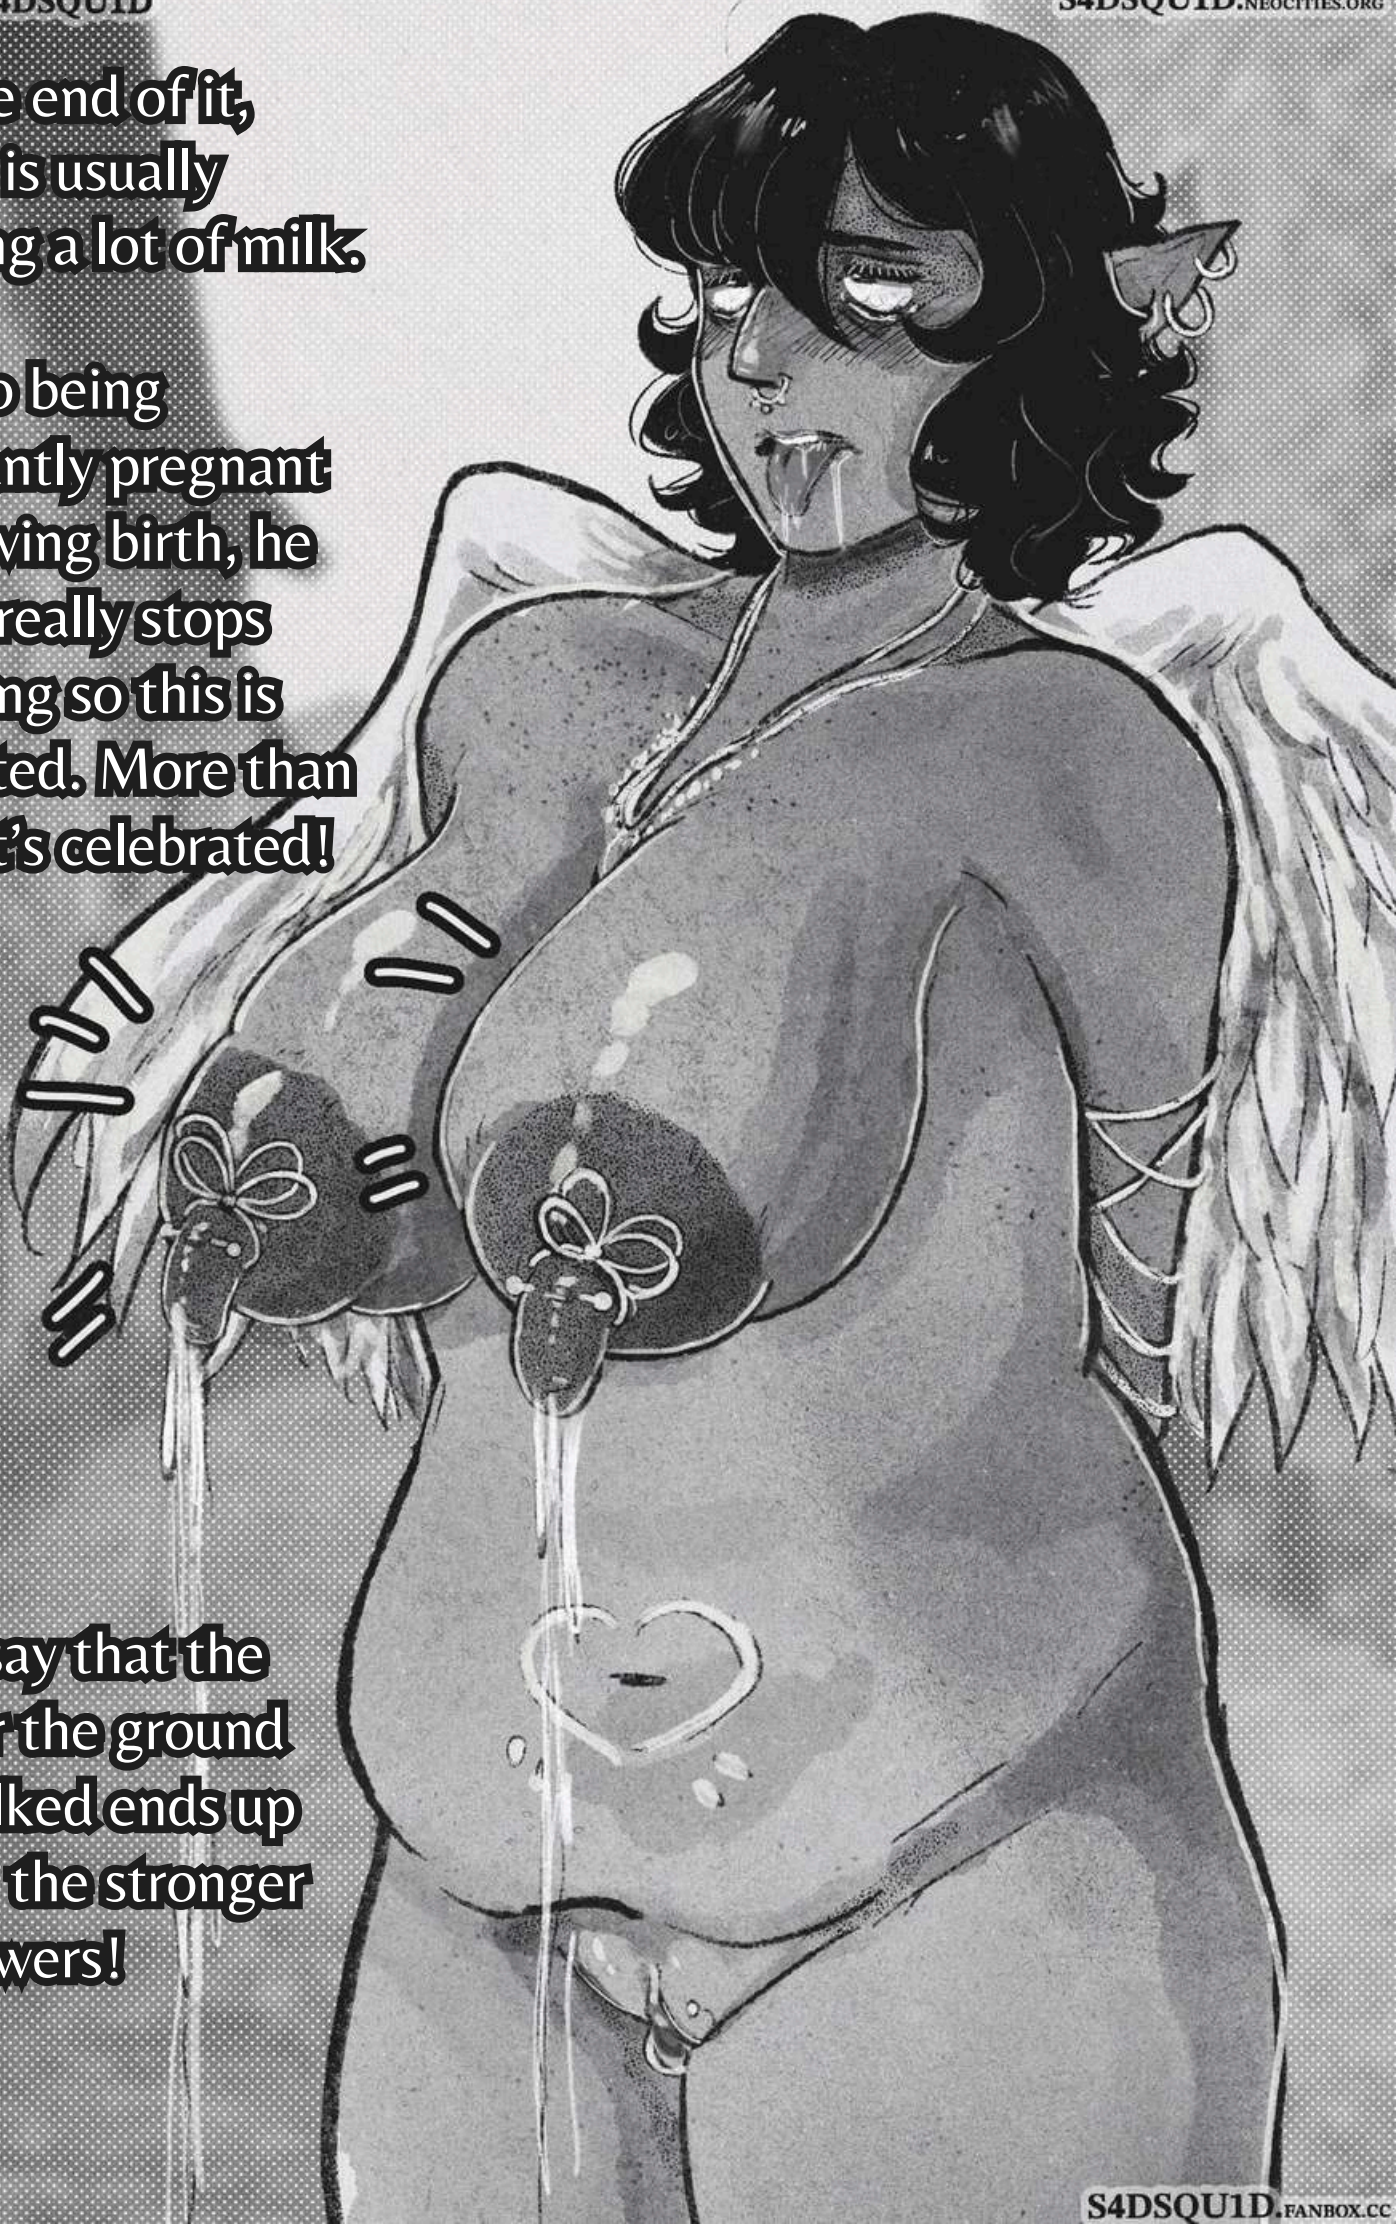

Then, he must walk around the main streets, very slowly, of course, to make sure anyone who wants has the chance to squeeze his breasts.

It's believed that doing that helps couples who are trying to get pregnant and new parents to more easily feed their kids, so it's a very important ritual!

**At the end of it,
Elum is usually
leaking a lot of milk.**

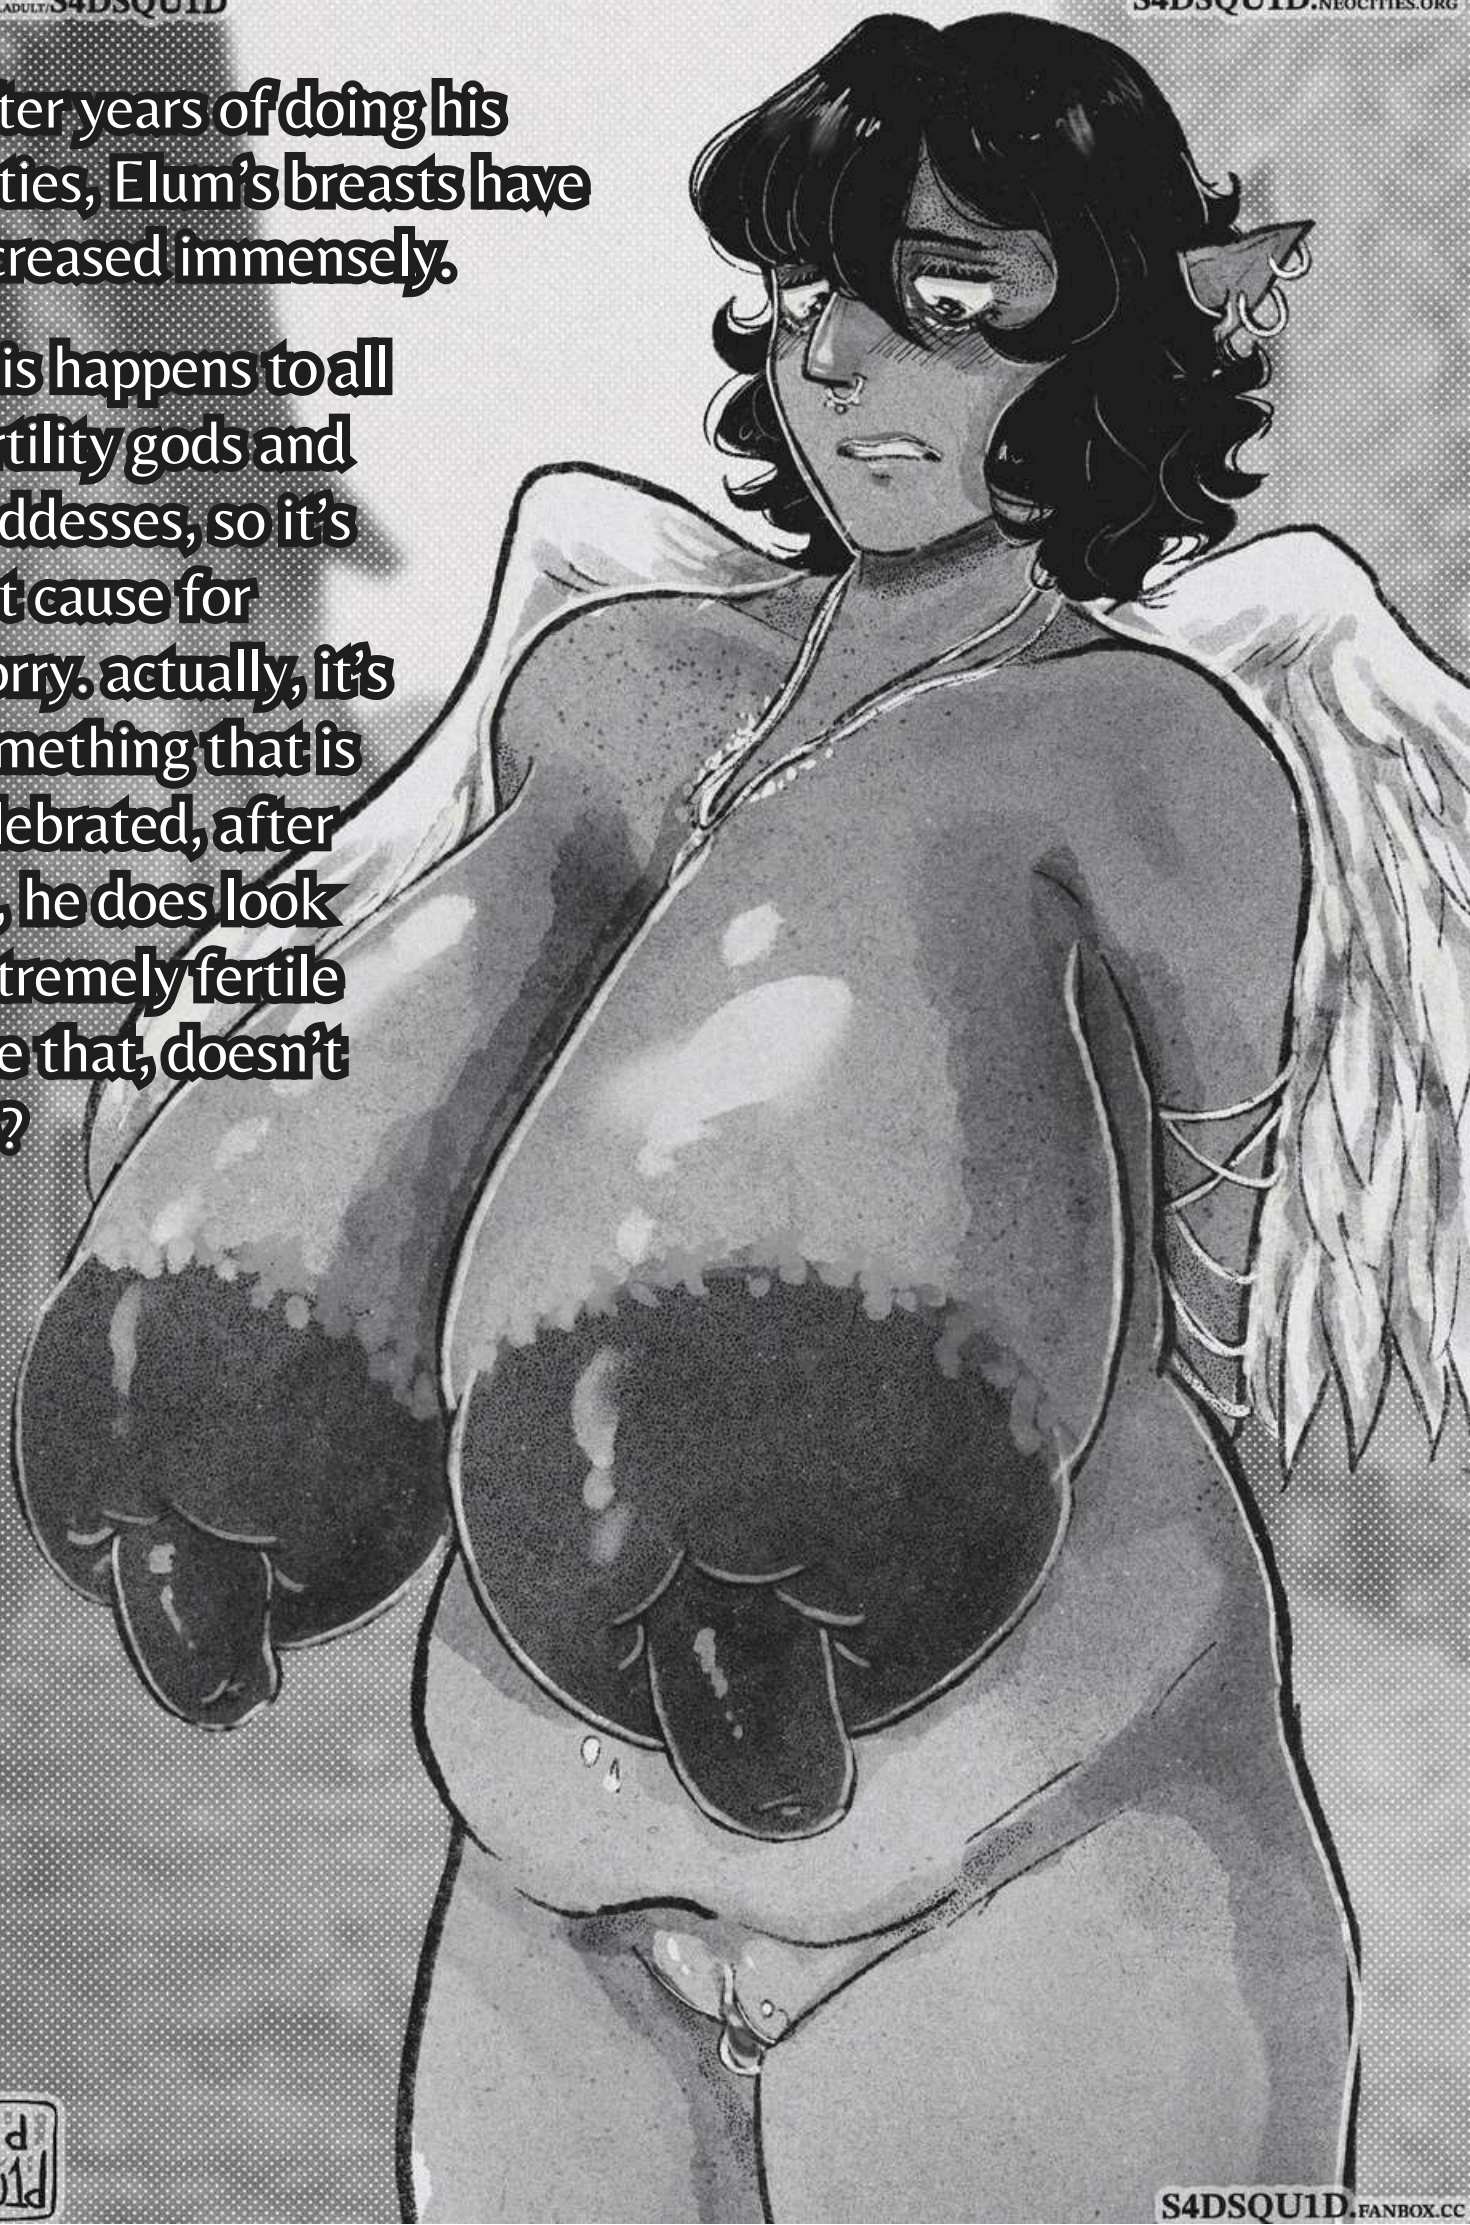

**Due to being
constantly pregnant
and giving birth, he
never really stops
lactating so this is
expected. More than
that, it's celebrated!**

**They say that the
wetter the ground
he walked ends up
being, the stronger
his powers!**

After years of doing his duties, Elum's breasts have increased immensely.

This happens to all fertility gods and goddesses, so it's not cause for worry. actually, it's something that is celebrated, after all, he does look extremely fertile like that, doesn't he?

Bigger breasts also mean much more space for decorations!

So, as the years went by, they became more and more complex, often featuring multiple piercings and intricate designs.

Elum used to be extremely self conscious about his breasts but it seems he has grown used to them.

Well, he still doesn't love them but at least he is no longer so distressed about them, so that's good, right?

Regardless, he still has a couple of pregnancies and rituals to endure before he can retire...

THANK YOU FOR READING!
